

Global oiled wildlife response preparedness

Hugo Nijkamp
Sea Alarm

- Assessment
- Experience + experienced responders
- Sea Alarm - Oil Spill Response
- Mobilisation procedure
- Contractual issues

Experiences global response

IFAW ER Team

Responses: Jessica 2001

Responses: Prestige 2002

Responses: *Treasure* 2000

Responses: Estonia 2006

Exchange experiences

Effects of Oil on Wildlife
7th International Conference
Hamburg - Germany - 14-16, Oct. 2003

Activities have led to

- Collegiality
- Working together developing approaches
- Cooperation in various incidents
- Lessons learnt
- Identification of good practices
- Increasing group of experienced responders

Global response capacity

Response Estonia 2006

Model response

Principles

- Southampton 2007

European responders

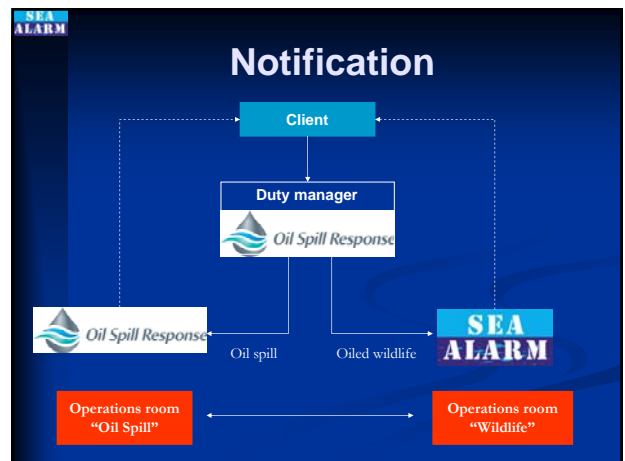

Training events

Spills

- Prestige
- Tricolor
- Germany (3x)
- Norway (3x)
- Estonia (1x)

Notification, and then?

- Response model in theory
- Several exercises (without mobilisation)
- Never a call out (so far)
- Reality: Responders all over the world

SEA ALARM

Information gathering

- Country Wildlife Response Profile
- Local resources
- Client
- ITOPF
- Etc.

SEA ALARM

Website activated

- Pre-defined web domain
- Factual information as collected
- Day to day log

SEA ALARM

Alert to directory of responders

- Telephone
- SMS
- E-mail
- Refer to activated website

SEA ALARM

Communication on developing picture

- All collected information goes on the website
- Picture will become clearer
- Request report on the availability of teams and individuals
- Preparation for mobilisation if needed
- Go / no go

SEA ALARM

Assessment

- Level 1 response
 - Monitoring
 - Distant advice
- Level 2 response
 - On site assessment
- Level 3 response
 - Mobilisation
 - Team
 - Equipment

SEA ALARM

Mobilisation

- Infrastructure
- Financial and logistic support

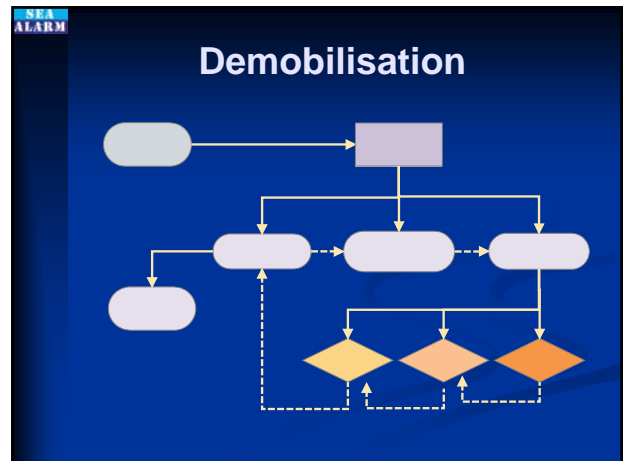

SEA ALARM

International assistance

1. Complement local resources (fill gaps)
2. Provide management oversight and leadership
3. Fly in complete team (no trained local forces)

Requirements

- Timely notification
- Integration into overall response
- Clear objectives
- Guaranteed resources
- Support of local wildlife authorities

SEA ALARM

Contracting

Service Level Agreement

Client

Agreement

SEA ALARM

MOU's

- OSR Standard response agreement
- BP – SAF: Standard OWR agreement

SEA ALARM

Non oil industry incidents?

The diagram shows a world map with various icons representing incidents. The icons include logos for 'FOCUS', 'BP', 'SEA ALARM', 'SANGHVI', and others. A red circle highlights a region in South America, specifically around Brazil and Chile.
